

Lung Cancer is the leading cause of cancer death in our community.

Most symptoms occur late in the disease when treatment options are limited.

GOOD SAMARITAN HOSPITAL

GOOD SAMARITAN HOSPITAL

now offers low dose CT scans (LDCTs) for lung cancer screening in individuals who are high risk for developing lung cancer.

You are eligible for lung cancer screening if you have the following risk factors.

- Age between 55-77
- Current or previous smoker within the last 15 years.
- 30 pack year smoking history
(Examples below)
 - 1 pack per/day x 30 years
 - 2 packs per/day x 15 years
 - 3 packs per/day x 10 years
- No Lung Symptoms
(no symptoms of fever, cough, coughing up blood, chest pain, new shortness of breath, unexplained weight loss)

If you are interested in lung cancer screening please contact us for more information about scheduling the exam.
